RoHS confirmation

Certificate of environmental compatibility

Compatibility with the environment is of particular importance to ELESTA GmbH. All materials we process, the consumables, packaging products, cleaning agents etc. we use have been selected with a view to their eco-friendliness already for many years. Careful handling of the natural resources, lowest possible energy consumption, pendulum systems for input and auxiliary materials as well as optimized recycling processes are a matter of course for us. They extend far beyond what legislation demands.

RoHS Conformity

Our products do not contain any substances in quantities exceeding the maximum concentration value levels specified in the EC directive 2011/65/EU dated 8 June 2011 (RoHS: Restriction of Hazardous Substances). In addition, we comply with Directive 2015/863/EU and therefore comply with the updated amendments to Annex II for the limit values of added plasticisers (DEHP, BBP, DBP, DIBP). ELESTA has gained all necessary information from its suppliers for all affected products and has taken adequate steps to confirm the status of the products.

Conformity applies to the entire product portfolio currently available, in particular the relays and encoders of the series

SIS2 SIS3, SIS4, SIS6, SIF3, SIF4, SIF6, SGR282 ZK, SIM2, SIM3, SIM4, SIR4, SIR4P, SIR6, SIR8, SIR10, SIP, SLR, SRD-SGR, SRD-SIM and E OI R.

Soldering processes and suitability for the process

Our products are suitable for all common soldering processes and higher temperatures required for lead free soldering. It is the user's responsibility, however, to check and confirm the suitability for the particular process in the individual case.

Application consultancy

ELESTA GmbH offers its customers comprehensive application consultancy also in the context of the RoHS directives and the environmental compatibility of ELESTA products.
